AUSTRALIA ONLY

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage caused by our goods. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. If you require assistance please call ASRock Tel: +886-2-28965588 ext.123 (Standard International call charges apply)
Who knew that at age 19, I would be a World Champion PC gamer. When I was 13, I actually played competitive billiards in professional tournaments and won four or five games off guys who played at the highest level. I actually thought of making a career of it, but at that young age situations change rapidly. Because I've been blessed with great hand-eye coordination and a grasp of mathematics (an important element in video gaming) I gravitated to that activity.

GOING PRO
I started professional gaming in 1999 when I entered the CPL (Cyberathlete Professional League) tournament in Dallas and won $4,000 for coming in third place. Emerging as one of the top players in the United States, a company interested in sponsoring me flew me to Sweden to compete against the top 12 players in the world. I won 18 straight games, lost none, and took first place, becoming the number one ranked Quake III player in the world in the process. Two months later I followed that success by traveling to Dallas and defending my title as the world's best Quake III player, winning the $40,000 grand prize. From there I entered competitions all over the world, including Singapore, Korea, Germany, Australia, Holland and Brazil in addition to Los Angeles, New York and St. Louis.

WINNING STREAK
I was excited to showcase my true gaming skills when defending my title as CPL Champion of the year at the CPL Winter 2001 because I would be competing in a totally different first person shooter (fps) game, Alien vs. Predator II. I won that competition and walked away with a new car. The next year I won the same title playing Unreal Tournament 2003, becoming the only three-time CPL champion of the year. And I did it playing a different game each year, something no one else has ever done and a feat of which I am extremely proud.

At QuakeCon 2002, I faced off against my rival ZeRo4 in one of the most highly anticipated matches of the year, winning in a 14 to (-1) killer victory. Competing at Quakecon 2004, I became the World's 1st Doom3 Champion by defeating Daler in a series of very challenging matches and earning $25,000 for the victory.

Since then Fatal1ty has traveled the globe to compete against the best in the world, winning prizes and acclaim, including the 2005 CPL World Tour Championship in New York City for a $150,000 first place triumph. In August 2007, Johnathan was awarded the first ever Lifetime Achievement Award in the four year history of the eSports-Award for "showing exceptional sportsmanship, taking part in shaping eSports into what it is today and for being the prime representative of this young sport. He has become the figurehead for eSports worldwide".
LIVIN’ LARGE
Since my first big tournament wins, I have been a “Professional Cyberathlete”, traveling the world and livin’ large with lots of International media coverage on outlets such as MTV, ESPN and a 60 Minutes segment on CBS to name only a few. It’s unreal - it’s crazy. I’m living a dream by playing video games for a living. I’ve always been athletic and took sports like hockey and football very seriously, working out and training hard. This discipline helps me become a better gamer and my drive to be the best has opened the doors necessary to become a professional.

A DREAM
Now, another dream is being realized – building the ultimate gaming computer, made up of the best parts under my own brand. Quality hardware makes a huge difference in competitions…a couple more frames per second and everything gets really nice. It’s all about getting the computer processing faster and allowing more fluid movement around the maps.

My vision for Fatal1ty hardware is to allow gamers to focus on the game without worrying about their equipment, something I’ve preached since I began competing. I don’t want to worry about my equipment. I want to be there – over and done with - so I can focus on the game. I want it to be the fastest and most stable computer equipment on the face of the planet, so quality is what Fatal1ty Brand products represent.

Johnathan “Fatal1ty” Wendel

Chapter 1 Introduction

Thank you for purchasing ASRock Fatal1ty X299 Gaming K6 Series motherboard, a reliable motherboard produced under ASRock’s consistently stringent quality control. It delivers excellent performance with robust design conforming to ASRock’s commitment to quality and endurance.

In this documentation, Chapter 1 and 2 contains the introduction of the motherboard and step-by-step installation guides. Chapter 3 contains the operation guide of the software and utilities. Chapter 4 contains the configuration guide of the BIOS setup.

Because the motherboard specifications and the BIOS software might be updated, the content of this documentation will be subject to change without notice. In case any modifications of this documentation occur, the updated version will be available on ASRock’s website without further notice. If you require technical support related to this motherboard, please visit our website for specific information about the model you are using. You may find the latest VGA cards and CPU support list on ASRock’s website as well. ASRock website http://www.asrock.com.

1.1 Package Contents

• ASRock Fatal1ty X299 Gaming K6 Series Motherboard (ATX Form Factor)
• ASRock Fatal1ty X299 Gaming K6 Series Quick Installation Guide
• ASRock Fatal1ty X299 Gaming K6 Series Support CD
• 1 x I/O Panel Shield
• 1 x ASRock SLI_HB_Bridge_2S Card (Optional)
• 1 x ASRock 3-Way SLI-2S1S Bridge Card (Optional)
• 4 x Serial ATA (SATA) Data Cables (Optional)
• 3 x Screws for M.2 Sockets (Optional)
1.2 Specifications

**Platform**
- ATX Form Factor
- 8 Layer PCB

**CPU**
- Supports Intel® Core™ X-Series Processor Family for the LGA 2066 Socket
- Digi Power design
- 11 Power Phase design
- Supports Intel® Turbo Boost Max Technology 3.0
  * Please note that the 4-Core processors only support Intel® Turbo Boost Technology 2.0.
- Supports ASRock Hyper BCLK Engine III

**Chipset**
- Intel® X299

**Memory**
- Quad Channel DDR4 Memory Technology
- 8 x DDR4 DIMM Slots
- Supports DDR4 4400+(OC)/4266(OC)/4133(OC)/4000 (OC)/3866(OC)/3800(OC)/3733(OC)/3600(OC)/3200(OC)/2933(OC)/2800(OC)/2666/2400/2133 non-ECC, un-buffered memory
  * The maximum memory frequency supported may vary by processor type.
  * Please refer to Memory Support List on ASRock’s website for more information. (http://www.asrock.com/)
- Supports non-ECC RDIMM (Registered DIMM)
- Max. capacity of system memory: 128GB
- Supports Intel® Extreme Memory Profile (XMP) 2.0
- 15μ Gold Contact in DIMM Slots

**Expansion Slot**
- 4 x PCI Express 3.0 x16 Slots*
  * If you install CPU with 44 lanes, PCIE1/PCIE2/PCIE3/PCIE5 will run at x16/x4/x16/x8.
  * If you install CPU with 28 lanes, PCIE1/PCIE2/PCIE3/PCIE5 will run at x16/x4/x8/x0.
  * If you install CPU with 16 lanes, PCIE1/PCIE2/PCIE3/PCIE5 will run at x16/x4/x0/x0 or x8/x4/x8/x0.
- Supports NVMe SSD as boot disks
- 1 x PCI Express 3.0 x1 Slot**
** If PCIE4 slot is occupied, M2_2 slot will support M.2 PCI Express module up to Gen3 x2 (16 Gb/s).
  - Supports AMD Quad CrossFireX™, 3-Way CrossFireX™ and CrossFireX™
  - Supports NVIDIA® Quad SLI™, 3-Way SLI™ and SLI™
  *** 3-Way CrossFireX™ and 3-Way SLI™ are only supported with CPU with 44 lanes.
  - 15μ Gold Contact in VGA PCIe Slot (PCIE1 and PCIE3)

**Audio**
  - 7.1 CH HD Audio with Content Protection (Realtek ALC1220 Audio Codec)
  - Premium Blu-ray Audio support
  - Supports Surge Protection
  - Nichicon Fine Gold Series Audio Caps
  - 120dB SNR DAC with Differential Amplifier
  - TI® NE5532 Premium Headset Amplifier for Front Panel Audio Connector (Supports up to 600 Ohm headsets)
  - Pure Power-In
  - Direct Drive Technology
  - PCB Isolate Shielding
  - Impedance Sensing on Front Out port
  - Individual PCB Layers for R/L Audio Channel
  - 15μ Gold Audio Connector
  - Supports Creative SoundBlaster Cinema3

**LAN**
  - Gigabit LAN 10/100/1000 Mb/s
  - 1 x Giga PHY Intel® I219V, 1 x GigaLAN Intel® I211AT
  - Supports Wake-On-LAN
  - Supports Lightning/ESD Protection
  - Supports Energy Efficient Ethernet 802.3az
  - Supports PXE

**Rear Panel**
  - 1 x PS/2 Mouse/Keyboard Port
  - 1 x Optical SPDIF Out Port
  - 4 x USB 2.0 Ports (Supports ESD Protection)
  * 1 x Fatal1ty Mouse Port (USB 2.0) is included
  - 1 x USB 3.1 Type-A Port (10 Gb/s) (ASMedia ASM3142)
    (Supports ESD Protection)
• 1 x USB 3.1 Type-C Port (10 Gb/s) (ASMedia ASM3142) (Supports ESD Protection)
• 4 x USB 3.0 Ports (Supports ESD Protection)
• 2 x RJ-45 LAN Ports with LED (ACT/LINK LED and SPEED LED)
• 1 x Clear CMOS Switch
• HD Audio Jacks: Rear Speaker / Central / Bass / Line in / Front Speaker / Microphone

Storage
• 8 x SATA3 6.0 Gb/s Connectors, support RAID (RAID 0, RAID 1, RAID 5, RAID 10, Intel Rapid Storage Technology 15 and Intel Smart Response Technology), NCQ, AHCI and Hot Plug*
* If M2_1 is occupied by a SATA-type M.2 device, SATA3_0 will be disabled.
* If M2_2 is occupied by a SATA-type M.2 device, SATA3_1 will be disabled.
* If M2_3 is occupied by a SATA-type M.2 device, SATA3_4 and SATA3_5 will be disabled.
* If M2_3 is occupied by a PCIe-type M.2 device, SATA3_4, SATA3_5, SATA3_6 and SATA3_7 will be disabled.
• 1 x Ultra M.2 Socket (M2_2), supports M Key type 2230/2242/2260/2280/22110 M.2 SATA3 6.0 Gb/s module and M.2 PCI Express module up to Gen3 x4 (32 Gb/s)**
• 2 x Ultra M.2 Sockets (M2_1 and M2_3), support M Key type 2230/2242/2260/2280 M.2 SATA3 6.0 Gb/s module and M.2 PCI Express module up to Gen3 x4 (32 Gb/s)**
** If PCIE4 slot is occupied, M2_2 slot will support M.2 PCI Express module up to Gen3 x2 (16 Gb/s).
** Supports Intel® Optane™ Technology
** Supports PCIe RAID (on M2_2 and M2_3)
** Supports NVMe SSD as boot disks
** Supports ASRock U.2 Kit

Connector
• 1 x Virtual RAID On CPU Header
• 1 x TPM Header
• 1 x Power LED and Speaker Header
• 2 x RGB LED Headers
* Support up to 12V/3A, 36W LED Strip
• 1 x CPU Fan Connector (4-pin)
  * The CPU Fan Connector supports the CPU fan of maximum 1A (12W) fan power.
• 1 x CPU Optional/Water Pump Fan Connector (4-pin)
  * The CPU Optional/Water Pump Fan supports the water cooler fan of maximum 1.5A (18W) fan power.
• 2 x Chassis Fan Connectors (4-pin) (Smart Fan Speed Control)
• 1 x Chassis Optional/Water Pump Fan Connector (4-pin)
  * The Chassis Optional/Water Pump Fan supports the water cooler fan of maximum 1.5A (18W) fan power.
  * CHA_FAN1 and CHA_FAN2 can auto detect if 3-pin or 4-pin fan is in use.
• 1 x 24 pin ATX Power Connector (Hi-Density Power Connector)
• 1 x 8 pin 12V Power Connector (Hi-Density Power Connector)
• 1 x Front Panel Audio Connector (15μ Gold Audio Connector)
• 1 x Thunderbolt AIC Connector (5-pin)
• 3 x USB 2.0 Headers (Support 6 USB 2.0 ports) (Supports ESD Protection)
• 2 x USB 3.0 Headers (Support 4 USB 3.0 ports) (ASMedia ASM1074 Hub) (Supports ESD Protection)
• 1 x Dr. Debug with LED

**BIOS Feature**

• 2 x AMI UEFI Legal BIOS with multilingual GUI support (1 x Main BIOS and 1 x Backup BIOS)
• Supports Secure Backup UEFI Technology
• ACPI 6.1 Compliant wake up events
• SMBIOS 3.0 Support
• CPU, DRAM, VPPM, VTMM, PCH 1.0V, VCCMPHY, VCCIO, VCCST, VCCSA, VCCSFR, VCCPLL, CLK VDD, PEGRCOMP Voltage Multi-adjustment
**Hardware Monitor**

- Temperature Sensing: CPU, CPU Optional/Water Pump, Chassis, Chassis Optional/Water Pump Fans
- Fan Tachometer: CPU, CPU Optional/Water Pump, Chassis, Chassis Optional/Water Pump Fans
- Quiet Fan (Auto adjust chassis fan speed by CPU temperature): CPU, CPU Optional/Water Pump, Chassis, Chassis Optional/Water Pump Fans
- Fan Multi-Speed Control: CPU, CPU Optional/Water Pump, Chassis, Chassis Optional/Water Pump Fans
- Voltage monitoring: +12V, +5V, +3.3V, CPU Vcore, DRAM, PCH 1.0V, VCCIO, VCCSA, VCCSFR

**OS**

- Microsoft* Windows* 10 64-bit

**Certifications**

- FCC, CE
- ErP/EuP ready (ErP/EuP ready power supply is required)

* For detailed product information, please visit our website: http://www.asrock.com

---

**Warning:** Please realize that there is a certain risk involved with overclocking, including adjusting the setting in the BIOS, applying Untied Overclocking Technology, or using third-party overclocking tools. Overclocking may affect your system’s stability, or even cause damage to the components and devices of your system. It should be done at your own risk and expense. We are not responsible for possible damage caused by overclocking.

To enable Multi-Streaming, you need to connect a front panel audio cable to the front panel audio header. After restarting your computer, you will find the "Mixer" tool on your system. Please select "Mixer ToolBox", click "Enable playback multi-streaming", and click "ok". Choose "2CH", "4CH", "6CH", or "8CH" and then you are allowed to select "Realtek HDA Primary output" to use the Rear Speaker, Central/Bass, and Front Speaker, or select "Realtek HDA Audio 2nd output" to use the front panel audio.
Chapter 2 Installation

This is an ATX form factor motherboard. Before you install the motherboard, study the configuration of your chassis to ensure that the motherboard fits into it.

Pre-installation Precautions

Take note of the following precautions before you install motherboard components or change any motherboard settings.

- Make sure to unplug the power cord before installing or removing the motherboard components. Failure to do so may cause physical injuries and damages to motherboard components.
- In order to avoid damage from static electricity to the motherboard’s components, NEVER place your motherboard directly on a carpet. Also remember to use a grounded wrist strap or touch a safety grounded object before you handle the components.
- Hold components by the edges and do not touch the ICs.
- Whenever you uninstall any components, place them on a grounded anti-static pad or in the bag that comes with the components.
- When placing screws to secure the motherboard to the chassis, please do not overtighten the screws! Doing so may damage the motherboard.
2.1 Installing the CPU

CAUTION:
Please note that X299 platform is only compatible with the LGA 2066 socket, which is incompatible with the LGA 2011-3 socket (for X99 platform).

1. Before you insert the 2066-Pin CPU into the socket, please check if the PnP cap is on the socket, if the CPU surface is unclean, or if there are any bent pins in the socket. Do not force to insert the CPU into the socket if above situation is found. Otherwise, the CPU will be seriously damaged.
2. Unplug all power cables before installing the CPU.
Please save and replace the cover if the processor is removed. The cover must be placed if you wish to return the motherboard for after service.
2.2 Installing the CPU Fan and Heatsink

1. Apply thermal paste to the CPU heatsink.

2. Mount the CPU fan onto the heatsink and secure it with screws.
2.3 Installation of Memory Modules (DIMM)

This motherboard provides eight 288-pin DDR4 (Double Data Rate 4) DIMM slots, and supports Quad Channel Memory Technology.

1. For quad channel configuration, you always need to install identical (the same brand, speed, size and chip-type) DDR4 DIMM pairs.
2. It is not allowed to install a DDR, DDR2 or DDR3 memory module into a DDR4 slot; otherwise, this motherboard and DIMM may be damaged.
3. The DIMM only fits in one correct orientation. It will cause permanent damage to the motherboard and the DIMM if you force the DIMM into the slot at incorrect orientation.

Quad Channel Memory Configuration  (For CPU with 44 or 28 PCIe lanes)

<table>
<thead>
<tr>
<th>Priority</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
</tr>
<tr>
<td>2</td>
</tr>
<tr>
<td>DDR4_B1</td>
</tr>
<tr>
<td>DDR4_B2</td>
</tr>
<tr>
<td>DDR4_A1</td>
</tr>
<tr>
<td>DDR4_A2</td>
</tr>
<tr>
<td>DDR4_D1</td>
</tr>
<tr>
<td>DDR4_D2</td>
</tr>
<tr>
<td>DDR4_C1</td>
</tr>
<tr>
<td>DDR4_C2</td>
</tr>
</tbody>
</table>

Dual Channel Memory Configuration  (For CPU with 16 PCIe lanes)

<table>
<thead>
<tr>
<th>Priority</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
</tr>
<tr>
<td>2</td>
</tr>
<tr>
<td>DDR4_D1</td>
</tr>
<tr>
<td>DDR4_D2</td>
</tr>
<tr>
<td>DDR4_C1</td>
</tr>
<tr>
<td>DDR4_C2</td>
</tr>
</tbody>
</table>

- Due to Intel® CPU spec definition, please install the memory modules on DDR4_A1, DDR4_B1, DDR4_C1 and DDR4_D1 for first priority. If the four DDR4 DIMM slots above are fully installed, and you want to use more than four memory modules, please install the other memory modules from left to right (from DDR4_A2, DDR4_B2, DDR4_D2 to DDR4_C2.)
- If only two memory modules are installed in the DDR4 DIMM slots, then Dual Channel Memory Technology is activated. If three memory modules are installed, then Triple Channel Memory Technology is activated. If more than four memory modules are installed in the DDR4 DIMM slots, then Quad Channel Memory Technology is activated.
• For CPU with 16 PCIe lanes, please install the memory modules on DDR4_C1, C2, D1 and D2 only.
2.4 Expansion Slots (PCI Express Slots)

There are 5 PCI Express slots on the motherboard.

Before installing an expansion card, please make sure that the power supply is switched off or the power cord is unplugged. Please read the documentation of the expansion card and make necessary hardware settings for the card before you start the installation.

PCIe slots:

PCIE1 (PCIe 3.0 x16 slot) is used for PCI Express x16 lane width graphics cards.
PCIE2 (PCIe 3.0 x16 slot) is used for PCI Express x4 lane width graphics cards.
PCIE3 (PCIe 3.0 x16 slot) is used for PCI Express x16 lane width graphics cards.
PCIE4 (PCIe 3.0 x1 slot) is used for PCI Express x1 lane width cards.
PCIE5 (PCIe 3.0 x16 slot) is used for PCI Express x8 lane width graphics cards.

* If you install CPU with 44 lanes, PCIE1/PCIE2/PCIE3/PCIE5 will run at x16/x4/x16/x8.
* If you install CPU with 28 lanes, PCIE1/PCIE2/PCIE3/PCIE5 will run at x16/x4/x8/x0.
* If you install CPU with 16 lanes, PCIE1/PCIE2/PCIE3/PCIE5 will run at x16/x4/x0/x0 or x8/x4/x8/x0.
* If PCIE4 slot is occupied, M2_2 slot will support M.2 PCI Express module up to Gen3 x2 (16 Gb/s).

For a better thermal environment, please connect a chassis fan to the motherboard’s chassis fan connector (CHA_FAN1, CHA_FAN2 or CHA_FAN3) when using multiple graphics cards.
2.5 Jumpers Setup

The illustration shows how jumpers are setup. When the jumper cap is placed on the pins, the jumper is “Short”. If no jumper cap is placed on the pins, the jumper is “Open”. The illustration shows a 3-pin jumper whose pin1 and pin2 are “Short” when a jumper cap is placed on these 2 pins.

Clear CMOS Jumper (CLRMOS1) (see p.7, No. 27)

CLRMOS1 allows you to clear the data in CMOS. To clear and reset the system parameters to default setup, please turn off the computer and unplug the power cord from the power supply. After waiting for 15 seconds, use a jumper cap to short pin2 and pin3 on CLRMOS1 for 5 seconds. However, please do not clear the CMOS right after you update the BIOS. If you need to clear the CMOS when you just finish updating the BIOS, you must boot up the system first, and then shut it down before you do the clear-CMOS action. Please be noted that the password, date, time, and user default profile will be cleared only if the CMOS battery is removed.
2.6 Onboard Headers and Connectors

Onboard headers and connectors are NOT jumpers. Do NOT place jumper caps over these headers and connectors. Placing jumper caps over the headers and connectors will cause permanent damage to the motherboard.

System Panel Header
(9-pin PANEL1) (see p.7, No. 19)

<table>

</tbody>
</table>

Connect the power switch, reset switch and system status indicator on the chassis to this header according to the pin assignments below. Note the positive and negative pins before connecting the cables.

PWRBTN (Power Switch):
Connect to the power switch on the chassis front panel. You may configure the way to turn off your system using the power switch.

RESET (Reset Switch):
Connect to the reset switch on the chassis front panel. Press the reset switch to restart the computer if the computer freezes and fails to perform a normal restart.

PLED (System Power LED):
Connect to the power status indicator on the chassis front panel. The LED is on when the system is operating. The LED keeps blinking when the system is in S1/S3 sleep state. The LED is off when the system is in S4 sleep state or powered off (S5).

HDLED (Hard Drive Activity LED):
Connect to the hard drive activity LED on the chassis front panel. The LED is on when the hard drive is reading or writing data.

The front panel design may differ by chassis. A front panel module mainly consists of power switch, reset switch, power LED, hard drive activity LED, speaker and etc. When connecting your chassis front panel module to this header, make sure the wire assignments and the pin assignments are matched correctly.
Power LED and Speaker Header
(7-pin SPK_PLED1)
(see p.7, No. 17)

Please connect the chassis power LED and the chassis speaker to this header.

Serial ATA3 Connectors
(SATA3_0_1:
see p.7, No. 13)
(SATA3_2_3:
see p.7, No. 14)
(SATA3_4_5:
see p.7, No. 15)
(SATA3_6_7:
see p.7, No. 16)

These eight SATA3 connectors support SATA data cables for internal storage devices with up to 6.0 Gb/s data transfer rate.
* If M2_1 is occupied by a SATA-type M.2 device, SATA3_0 will be disabled.
* If M2_2 is occupied by a SATA-type M.2 device, SATA3_1 will be disabled.
* If M2_3 is occupied by a SATA-type M.2 device, SATA3_4 and SATA3_5 will be disabled.
* If M2_3 is occupied by a PCIe-type M.2 device, SATA3_4, SATA3_5, SATA3_6 and SATA3_7 will be disabled.

USB 2.0 Headers
(9-pin USB_5_6)
(see p.7, No. 23)
(9-pin USB_7_8)
(see p.7, No. 22)
(9-pin USB_9_10)
(see p.7, No. 21)

There are three headers on this motherboard.
Each USB 2.0 header can support two ports.
USB 3.0 Headers
(19-pin USB3_5_6)
(see p.7, No. 11)

There are two headers on this motherboard. Each USB 3.0 header can support two ports.

(19-pin USB3_7_8)
(see p.7, No. 12)

Front Panel Audio Header
(9-pin HD_AUDIO1)
(see p.7, No. 28)

This header is for connecting audio devices to the front audio panel.

1. High Definition Audio supports Jack Sensing, but the panel wire on the chassis must support HDA to function correctly. Please follow the instructions in our manual and chassis manual to install your system.

2. If you use an AC’97 audio panel, please install it to the front panel audio header by the steps below:
   A. Connect Mic_IN (MIC) to MIC2_L.
   B. Connect Audio_R (RIN) to OUT2_R and Audio_L (LIN) to OUT2_L.
   C. Connect Ground (GND) to Ground (GND).
   D. MIC_RET and OUT_RET are for the HD audio panel only. You don’t need to connect them for the AC’97 audio panel.
   E. To activate the front mic, go to the “FrontMic” Tab in the Realtek Control panel and adjust “Recording Volume”.

Chassis Fan Connectors
(4-pin CHA_FAN1)
(see p.7, No. 18)

Please connect fan cables to the fan connectors and match the black wire to the ground pin.
(4-pin CHA_FAN2)  
(see p.7, No. 29)

Chassis Optional/Water Pump Fan Connector  
(4-pin CHA_FAN3/W_PUMP2)  
(see p.7, No. 20)

This motherboard provides two 4-Pin water cooling chassis fan connectors. If you plan to connect a 3-Pin chassis water cooler fan, please connect it to Pin 1-3.

CPU Fan Connector  
(4-pin CPU_FAN1)  
(see p.7, No. 7)

This motherboard provides a 4-Pin CPU fan (Quiet Fan) connector. If you plan to connect a 3-Pin CPU fan, please connect it to Pin 1-3.

CPU Optional/Water Pump Fan Connector  
(4-pin CPU_OPT/W_PUMP)  
(see p.7, No. 4)

This motherboard provides a 4-Pin water cooling CPU fan connector. If you plan to connect a 3-Pin CPU water cooler fan, please connect it to Pin 1-3.

ATX Power Connector  
(24-pin ATXPWR1)  
(see p.7, No. 9)

This motherboard provides a 24-pin ATX power connector. To use a 20-pin ATX power supply, please plug it along Pin 1 and Pin 13.
ATX 12V Power Connector  
(8-pin ATX12V1)  
(see p.7, No. 3)  

This motherboard provides an 8-pin ATX 12V power connector. To use a 4-pin ATX power supply, please plug it along Pin 1 and Pin 5.

TPM Header  
(17-pin TPMS1)  
(see p.7, No. 24)  

This connector supports Trusted Platform Module (TPM) system, which can securely store keys, digital certificates, passwords, and data. A TPM system also helps enhance network security, protects digital identities, and ensures platform integrity.

Thunderbolt AIC Connector  
(5-pin TB1)  
(see p.7, No. 25)  

Please connect a Thunderbolt™ add-in card (AIC) to this connector via the GPIO cable.

RGB LED Headers  
(4-pin RGB_LED1)  
(see p.7, No. 26)  

(4-pin RGB_LED2)  
(see p.7, No. 8)  

These two RGB headers are used to connect RGB LED extension cable which allows users to choose from various LED lighting effects.  
**Caution: Never install the RGB LED cable in the wrong orientation; otherwise, the cable may be damaged.**  
*Please refer to page 54 for further instructions on these two headers.*
Virtual RAID On CPU Header (4-pin VROC1) (see p.7, No. 10) This connector supports Intel® Virtual RAID on CPU and NVME/AHCI RAID on CPU PCIE.

With the introduction of the Intel VROC product, there are three modes of operation:

<table>
<thead>
<tr>
<th>SKU</th>
<th>HW key required</th>
<th>Key features</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pass-thru</td>

<td>• RAID 5 Write Hole Closure</td>
</tr>
</tbody>
</table>

*Only Intel SSDs are supported.  
*For further details on VROC, please refer to the official information released by Intel.
2.7 Smart Switches

The motherboard has a smart switch: Clear CMOS Switch, allowing users to clear the CMOS values.

Clear CMOS Switch (CLRCBTN) allows users to quickly clear the CMOS values.

This function is workable only when you power off your computer and unplug the power supply.
2.8 Dr. Debug

Dr. Debug is used to provide code information, which makes troubleshooting even easier. Please see the diagrams below for reading the Dr. Debug codes.

<table>
<thead>

2.9 SLI™, 3-Way SLI™ and Quad SLI™ Operation Guide

This motherboard supports NVIDIA® SLI™, 3-Way SLI™ and Quad SLI™ (Scalable Link Interface) technology that allows you to install up to three identical PCI Express x16 graphics cards. Currently, NVIDIA® SLI™ and Quad SLI™ technology supports Windows® 10 64-bit.

*3-Way SLI™ are only supported with CPU with 44 lanes.

Requirements

1. You should only use identical SLI™-ready graphics cards that are NVIDIA® certified.
2. Make sure that your graphics card driver supports NVIDIA® SLI™ technology. Download the drivers from the NVIDIA® website: www.nvidia.com
3. Make sure that your power supply unit (PSU) can provide at least the minimum power your system requires. It is recommended to use a NVIDIA® certified PSU. Please refer to the NVIDIA® website for details.

2.9.1 Installing Two SLI™-Ready Graphics Cards

Step 1

Insert one graphics card into PCIE1 slot and the other graphics card to PCIE3 slot. Make sure that the cards are properly seated on the slots.

Step 2

If required, connect the auxiliary power source to the PCI Express graphics cards.
**Step 3**
Align and insert the ASRock SLI_HB_Bridge_2S Card to the goldfingers on each graphics card. Make sure the ASRock SLI_HB_Bridge_2S Card is firmly in place.

**Step 4**
Connect a VGA cable or a DVI cable to the monitor connector or the DVI connector of the graphics card that is inserted to PCIE1 slot.
2.9.2 Installing Three SLI™-Ready Graphics Cards

**Step 1**
Insert one graphics card into PCIE1 slot, another graphics card to PCIE3 slot, and the other graphics card to PCIE5 slot. Make sure that the cards are properly seated on the slots.

**Step 2**
Connect the auxiliary power source to the PCI Express graphics card. Please make sure that both power connectors on the PCI Express graphics card are connected. Repeat this step on the three graphics cards.

**Step 3**
Align and insert the ASRock 3-Way SLI-2S1S Bridge Card to the goldfingers on each graphics card. Make sure the ASRock 3-Way SLI-2S1S Bridge Card is firmly in place.
**Step 4**

Connect a VGA cable or a DVI cable to the monitor connector or the DVI connector of the graphics card that is inserted to PCIE1 slot.
2.9.3 Driver Installation and Setup

Install the graphics card drivers to your system. After that, you can enable the Multi-Graphics Processing Unit (GPU) in the NVIDIA nView system tray utility. Please follow the below procedures to enable the multi-GPU.

**Step 1**
Double-click the NVIDIA Control Panel icon in the Windows system tray.

**Step 2**
In the left pane, click Set SLI and PhysX configuration. Then select Maximize 3D performance and click Apply.

**Step 3**
Reboot your system.
2.10 CrossFireX™, 3-Way CrossFireX™ and Quad CrossFireX™ Operation Guide

This motherboard supports CrossFireX™, 3-way CrossFireX™ and Quad CrossFireX™ that allows you to install up to three identical PCI Express x16 graphics cards. Currently CrossFireX™, 3-way CrossFireX™ and Quad CrossFireX™ are supported with Windows® 10 64-bit OS.

* 3-Way CrossFireX™ is only supported with CPU with 44 lanes.

1. You should only use identical CrossFireX™-ready graphics cards that are AMD certified.
2. Make sure that your graphics card driver supports AMD CrossFireX™ technology.
   Download the drivers from the AMD’s website: www.amd.com
3. Make sure that your power supply unit (PSU) can provide at least the minimum power your system requires. It is recommended to use a AMD certified PSU. Please refer to the AMD’s website for details.
4. If you pair a 12-pipe CrossFireX™ Edition card with a 16-pipe card, both cards will operate as 12-pipe cards while in CrossFireX™ mode.
5. Different CrossFireX™ cards may require different methods to enable CrossFireX™.
   Please refer to AMD graphics card manuals for detailed installation guide.

2.10.1 Installing Two CrossFireX™-Ready Graphics Cards

**Step 1**

Insert one graphics card into PCIE1 slot and the other graphics card to PCIE3 slot. Make sure that the cards are properly seated on the slots.

**Step 2**

Connect two graphics cards by installing a CrossFire Bridge on the CrossFire Bridge Interconnects on the top of the graphics cards. (The CrossFire Bridge is provided with the graphics card you purchase, not bundled with this motherboard. Please refer to your graphics card vendor for details.)
Step 3
Connect a VGA cable or a DVI cable to the monitor connector or the DVI connector of the graphics card that is inserted to PCIE1 slot.
2.10.2 Installing Three CrossFireX™-Ready Graphics Cards

**Step 1**
Insert one graphics card into PCIE1 slot, another graphics card to PCIE3 slot, and the other graphics card to PCIE5 slot. Make sure that the cards are properly seated on the slots.

**Step 2**
Use one CrossFire Bridge to connect the graphics cards on PCIE1 and PCIE3 slots, and use the other CrossFire Bridge to connect the graphics cards on PCIE3 and PCIE5 slots. (The CrossFire Bridge is provided with the graphics card you purchase, not bundled with this motherboard. Please refer to your graphics card vendor for details.)

**Step 3**
Connect a VGA cable or a DVI cable to the monitor connector or the DVI connector of the graphics card that is inserted to PCIE1 slot.
2.10.3 Driver Installation and Setup

Step 1
Power on your computer and boot into OS.

Step 2
Remove the AMD drivers if you have any VGA drivers installed in your system.

Step 3
Install the required drivers and CATALYST Control Center then restart your computer. Please check AMD’s website for details.

Step 4
Double-click the AMD Catalyst Control Center icon in the Windows® system tray.

Step 5
In the left pane, click Performance and then AMD CrossFireX™. Then select Enable AMD CrossFireX and click Apply. Select the GPU number according to your graphics card and click Apply.

The Catalyst Uninstaller is an optional download. We recommend using this utility to uninstall any previously installed Catalyst drivers prior to installation. Please check AMD’s website for AMD driver updates.
2.11 M.2_SSD (NGFF) Module Installation Guide

The M.2, also known as the Next Generation Form Factor (NGFF), is a small size and versatile card edge connector that aims to replace mPCIe and mSATA. The Ultra M.2 Socket can accommodate either a M.2 SATA3 6.0 Gb/s module or a M.2 PCI Express module up to Gen3 x4 (32 Gb/s).

* If M2_1 is occupied by a SATA-type M.2 device, SATA3_0 will be disabled.
* If M2_2 is occupied by a SATA-type M.2 device, SATA3_1 will be disabled.
* If M2_3 is occupied by a SATA-type M.2 device, SATA3_4 and SATA3_5 will be disabled.
* If M2_3 is occupied by a PCIe-type M.2 device, SATA3_4, SATA3_5, SATA3_6 and SATA3_7 will be disabled.
* If PCIE4 slot is occupied, M2_2 slot will support M.2 PCI Express module up to Gen3 x2 (16 Gb/s).

Installing the M.2_SSD (NGFF) Module

The following is an example of installing M.2_SSD (NGFF) module into the M2_2.

**Step 1**
Prepare a M.2_SSD (NGFF) module and the screw.

**Step 2**
Depending on the PCB type and length of your M.2_SSD (NGFF) module, find the corresponding nut location to be used.

<table>
<thead>
<tr>
<th>No.</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nut Location</td>
<td>A</td>
<td>B</td>
<td>C</td>
<td>D</td>
<td>E</td>
</tr>
<tr>
<td>PCB Length</td>
<td>3cm</td>
<td>4.2cm</td>
<td>6cm</td>
<td>8cm</td>
<td>11cm</td>
</tr>
<tr>
<td>Module Type</td>
<td>Type2230</td>
<td>Type 2242</td>
<td>Type2260</td>
<td>Type 2280</td>
<td>Type 22110</td>
</tr>
</tbody>
</table>
Step 3
Move the standoff based on the module type and length. The standoff is placed at the nut location D by default. Skip Step 3 and 4 and go straight to Step 5 if you are going to use the default nut. Otherwise, release the standoff by hand.

Step 4
Peel off the yellow protective film on the nut to be used. Hand tighten the standoff into the desired nut location on the motherboard.

Step 5
Gently insert the M.2 (NGFF) SSD module into the M.2 slot. Please be aware that the M.2 (NGFF) SSD module only fits in one orientation.

Step 6
Tighten the screw with a screwdriver to secure the module into place. Please do not overtighten the screw as this might damage the module.

For the latest updates of M.2_SSD (NFGG) module support list, please visit our website for details: [http://www.asrock.com](http://www.asrock.com)
Chapter 3 Software and Utilities Operation

3.1 Installing Drivers

The Support CD that comes with the motherboard contains necessary drivers and useful utilities that enhance the motherboard’s features.

Running The Support CD

To begin using the support CD, insert the CD into your CD-ROM drive. The CD automatically displays the Main Menu if “AUTORUN” is enabled in your computer. If the Main Menu does not appear automatically, locate and double click on the file “ASRSETUP.EXE” in the Support CD to display the menu.

Drivers Menu

The drivers compatible to your system will be auto-detected and listed on the support CD driver page. Please click Install All or follow the order from top to bottom to install those required drivers. Therefore, the drivers you install can work properly.

Utilities Menu

The Utilities Menu shows the application software that the motherboard supports. Click on a specific item then follow the installation wizard to install it.
3.2 F-Stream

F-Stream is ASRock’s multi purpose software suite with a new interface, more new features and improved utilities.

3.2.1 Installing F-Stream

F-Stream can be downloaded from ASRock Live Update & APP Shop. After the installation, you will find the icon “F-Stream” on your desktop. Double-click the “F-Stream” icon, F-Stream main menu will pop up.

3.2.2 Using F-Stream

There are six sections in F-Stream main menu: Operation Mode, OC Tweaker, System Info, FAN-Tastic Tuning and Settings.

Operation Mode

Choose an operation mode for your computer.
OC Tweaker
Configurations for overclocking the system.

System Info
View information about the system.
*The System Browser tab may not appear for certain models.
FAN-Tastic Tuning

Configure up to five different fan speeds using the graph. The fans will automatically shift to the next speed level when the assigned temperature is met.

Settings

Configure ASRock F-Stream. Click to select "Auto run at Windows Startup" if you want F-Stream to be launched when you start up the Windows operating system.
3.3 ASRock Live Update & APP Shop

The ASRock Live Update & APP Shop is an online store for purchasing and downloading software applications for your ASRock computer. You can quickly and easily install various apps and support utilities. With ASRock APP Shop, you can optimize your system and keep your motherboard up to date simply with a few clicks.

Double-click 📀 on your desktop to access ASRock Live Update & APP Shop utility.

*You need to be connected to the Internet to download apps from the ASRock Live Update & APP Shop.

3.3.1 UI Overview

**Category Panel**: The category panel contains several category tabs or buttons that when selected the information panel below displays the relative information.

**Information Panel**: The information panel in the center displays data about the currently selected category and allows users to perform job-related tasks.

**Hot News**: The hot news section displays the various latest news. Click on the image to visit the website of the selected news and know more.
3.3.2 Apps

When the “Apps” tab is selected, you will see all the available apps on screen for you to download.

Installing an App

**Step 1**

Find the app you want to install.

The most recommended app appears on the left side of the screen. The other various apps are shown on the right. Please scroll up and down to see more apps listed.

You can check the price of the app and whether you have already installed it or not.

- The red icon displays the price or "Free" if the app is free of charge.
- The green "Installed" icon means the app is installed on your computer.

**Step 2**

Click on the app icon to see more details about the selected app.
Step 3
If you want to install the app, click on the red icon to start downloading.

Step 4
When installation completes, you can find the green "Installed" icon appears on the upper right corner.

To uninstall it, simply click on the trash can icon.
*The trash icon may not appear for certain apps.
Upgrading an App

You can only upgrade the apps you have already installed. When there is an available new version for your app, you will find the mark of "New Version" appears below the installed app icon.

**Step 1**
Click on the app icon to see more details.

**Step 2**
Click on the yellow icon to start upgrading.
3.3.3 BIOS & Drivers

Installing BIOS or Drivers

When the "BIOS & Drivers" tab is selected, you will see a list of recommended or critical updates for the BIOS or drivers. Please update them all soon.

**Step 1**

Please check the item information before update. Click on 📈 to see more details.

**Step 2**

Click to select one or more items you want to update.

**Step 3**

Click Update to start the update process.
3.3.4 Setting

In the "Setting" page, you can change the language, select the server location, and determine if you want to automatically run the ASRock Live Update & APP Shop on Windows startup.
3.4 Creative SoundBlaster Cinema3

The SoundBlaster™ Cinema3, powered by the SBX Pro Studio technologies, is designed to bring the same great audio experience found in live performances, films, and recording studios to the PC. With this utility, you can easily enhance your audio environment in five modes, including Headphones, Speakers, Music, Movie, Game, Voice and Custom.

There are five functions in SoundBlaster™ Cinema3:

<table>
<thead>
<tr>
<th>No.</th>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Surround</td>
<td>Creating unprecedented levels of audio realism by producing virtual speakers around, above and below you.</td>
</tr>
<tr>
<td>2</td>
<td>Crystalizer</td>
<td>Making music sound as good as the artist originally intended by ensuring that every audio detail is heard.</td>
</tr>
<tr>
<td>3</td>
<td>Bass</td>
<td>Enhancing bass sound experience by expanding the low frequency tones.</td>
</tr>
<tr>
<td>4</td>
<td>Smart Volume</td>
<td>Minimizing abrupt volume changes by automatically adjusting the loudness of your audio playback.</td>
</tr>
<tr>
<td>5</td>
<td>Dialog Plus</td>
<td>Enhancing voices in music and movies for drastically clearer vocal range.</td>
</tr>
</tbody>
</table>
3.5 ASRock RGB LED

ASRock RGB LED is a lighting control utility specifically designed for unique individuals with sophisticated tastes to build their own stylish colorful lighting system. Simply by connecting the LED strip, you can customize various lighting schemes and patterns, including Static, Breathing, Strobe, Cycling, Music, Wave and more.

Connecting the LED Strip

Connect your RGB LED strips to the RGB LED Headers (RGB_LED1, RGB_LED2) on the motherboard.

⚠️ 1. Never install the RGB LED cable in the wrong orientation; otherwise, the cable may be damaged.
2. Before installing or removing your RGB LED cable, please power off your system and unplug the power cord from the power supply. Failure to do so may cause damages to motherboard components.

🌟 1. Please note that the RGB LED strips do not come with the package.
2. The RGB LED header supports standard 5050 RGB LED strip (12V/G/R/B), with a maximum power rating of 3A (12V) and length within 2 meters.
ASRock RGB LED Utility

Now you can adjust the RGB LED color through the ASRock RGB LED utility. Download this utility from the ASRock Live Update & APP Shop and start coloring your PC style your way!

- Drag the tab to customize your preference.
- Select a RGB LED light effect from the drop-down menu.
- Toggle on/off the RGB LED switch
- Sync RGB LED effects for all LED regions of the motherboard
- Apply All

Select a RGB LED light effect from the drop-down menu.

Chapter 4 UEFI SETUP UTILITY

4.1 Introduction

This section explains how to use the UEFI SETUP UTILITY to configure your system. You may run the UEFI SETUP UTILITY by pressing <F2> or <Del> right after you power on the computer, otherwise, the Power-On-Self-Test (POST) will continue with its test routines. If you wish to enter the UEFI SETUP UTILITY after POST, restart the system by pressing <Ctl> + <Alt> + <Delete>, or by pressing the reset button on the system chassis. You may also restart by turning the system off and then back on.

Because the UEFI software is constantly being updated, the following UEFI setup screens and descriptions are for reference purpose only, and they may not exactly match what you see on your screen.
4.2 EZ Mode

The EZ Mode screen appears when you enter the BIOS setup program by default. EZ mode is a dashboard which contains multiple readings of the system’s current status. You can check the most crucial information of your system, such as CPU speed, DRAM frequency, SATA information, fan speed, etc.

Press <F6> or click the "Advanced Mode" button at the upper right corner of the screen to switch to "Advanced Mode" for more options.

<table>
<thead>
<tr>
<th>No.</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Help</td>
</tr>
<tr>
<td>2</td>
<td>Load UEFI Defaults</td>
</tr>
<tr>
<td>3</td>
<td>Save Changes and Exit</td>
</tr>
<tr>
<td>4</td>
<td>Discard Changes</td>
</tr>
<tr>
<td>5</td>
<td>Change Language</td>
</tr>
<tr>
<td>6</td>
<td>Switch to Advanced Mode</td>
</tr>
</tbody>
</table>
4.3  Advanced Mode

The Advanced Mode provides more options to configure the BIOS settings. Refer to the following sections for the detailed configurations.

To access the EZ Mode, press <F6> or click the "EZ Mode" button at the upper right corner of the screen.

4.3.1  UEFI Menu Bar

The top of the screen has a menu bar with the following selections:

<table>
<thead>
<tr>
<th>Selection</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Main</strong></td>
<td>For setting system time/date information</td>
</tr>
<tr>
<td><strong>OC Tweaker</strong></td>
<td>For overclocking configurations</td>
</tr>
<tr>
<td><strong>Advanced</strong></td>
<td>For advanced system configurations</td>
</tr>
<tr>
<td><strong>Tool</strong></td>
<td>Useful tools</td>
</tr>
<tr>
<td><strong>H/W Monitor</strong></td>
<td>Displays current hardware status</td>
</tr>
<tr>
<td><strong>Boot</strong></td>
<td>For configuring boot settings and boot priority</td>
</tr>
<tr>
<td><strong>Security</strong></td>
<td>For security settings</td>
</tr>
<tr>
<td><strong>Exit</strong></td>
<td>Exit the current screen or the UEFI Setup Utility</td>
</tr>
</tbody>
</table>
4.3.2 Navigation Keys

Use <→> key or <←> key to choose among the selections on the menu bar, and use <↑> key or <↓> key to move the cursor up or down to select items, then press <Enter> to get into the sub screen. You can also use the mouse to click your required item.

Please check the following table for the descriptions of each navigation key.

<table>
<thead>
<tr>
<th>Navigation Key(s)</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>+ / -</td>
<td>To change option for the selected items</td>
</tr>
<tr>
<td>&lt;Tab&gt;</td>
<td>Switch to next function</td>
</tr>
<tr>
<td>&lt;PGUP&gt;</td>
<td>Go to the previous page</td>
</tr>
<tr>
<td>&lt;PGDN&gt;</td>
<td>Go to the next page</td>
</tr>
<tr>
<td>&lt;HOME&gt;</td>
<td>Go to the top of the screen</td>
</tr>
<tr>
<td>&lt;END&gt;</td>
<td>Go to the bottom of the screen</td>
</tr>
<tr>
<td>&lt;F1&gt;</td>
<td>To display the General Help Screen</td>
</tr>
<tr>
<td>&lt;F5&gt;</td>
<td>Add / Remove Favorite</td>
</tr>
<tr>
<td>&lt;F6&gt;</td>
<td>Enter / Exit EZ Mode</td>
</tr>
<tr>
<td>&lt;F7&gt;</td>
<td>Discard changes and exit the SETUP UTILITY</td>
</tr>
<tr>
<td>&lt;F9&gt;</td>
<td>Load optimal default values for all the settings</td>
</tr>
<tr>
<td>&lt;F10&gt;</td>
<td>Save changes and exit the SETUP UTILITY</td>
</tr>
<tr>
<td>&lt;F12&gt;</td>
<td>Print screen</td>
</tr>
<tr>
<td>&lt;ESC&gt;</td>
<td>Jump to the Exit Screen or exit the current screen</td>
</tr>
</tbody>
</table>
4.4 Main Screen

When you enter the UEFI SETUP UTILITY, the Main screen will appear and display the system overview.

Favorite

Display your collection of BIOS items. Press F5 to add/remove your favorite items.
4.5 OC Tweaker Screen

In the OC Tweaker screen, you can set up overclocking features.

Because the UEFI software is constantly being updated, the following UEFI setup screens and descriptions are for reference purpose only, and they may not exactly match what you see on your screen.

Advanced Turbo

You can use this option to increase your system performance. This option appears only when your CPU supports this function. This option appears only when you adopt K-Series CPU.

Load Optimized CPU OC Setting

You can use this option to load optimized CPU overclocking setting. Please note that overclocking may cause damage to your CPU and motherboard. It should be done at your own risk and expense.
CPU Configuration

Per Core Mode

Per core mode is disabled by default.

CLR Max Ratio
Sets the maximum OC Ratio for the CLR Domain.

CLR Min Ratio
Sets the minimum OC Ratio for the CLR Domain.

Flex Ratio
Sets the value for the CPU Flex Ratio.

BCLK Frequency
The CPU speed is determined by the CPU Ratio multiplied with the BCLK. Increasing the BCLK will increase the internal CPU clock speed but also affect the clock speed of other components.

BCLK Step
The CPU speed is determined by the CPU Ratio multiplied with the BCLK. Increasing the BCLK will increase the internal CPU clock speed but also affect the clock speed of other components.

BCLK Reset Range
Configure the BCLK Reset Range. Issue a reset when BCLK overclocking exceed this range.

Stable Delay
Configure the delay time after BCLK settings for stable signals.

CPU PLL Spread Spectrum
Enable CPU PLL Spread Spectrum to reduce electromagnetic interference for passing EMI tests. Disable to achieve higher clock speeds when overclocking.

SRC PLL Spread Spectrum
Enable SRC PLL Spread Spectrum to reduce electromagnetic interference for passing EMI tests. Disable to achieve higher clock speeds when overclocking.

CPU BCLK Amplitude
Configure the BCLK Amplitude for ClockGen.
**SRC BCLK Amplitude**
Configure the BCLK Amplitude for SRC.

**SATA BCLK Amplitude**
Configure the BCLK Amplitude for SATA.

**CPU1 Slew Rate**
Configure the CPU Slew Rate. Adjust the BCLK signal by defining the maximum change rate of the output voltage. Higher value will result in a shorter signal rising time.

**CPU2/SRC1 Slew Rate**
Configure the CPU2/SRC1 Slew Rate. Adjust the BCLK signal by defining the maximum change rate of the output voltage. Higher value will result in a shorter signal rising time.

**SRCO Slew Rate**
Configure the SRCO Slew Rate. Adjust the BCLK signal by defining the maximum change rate of the output voltage. Higher value will result in a shorter signal rising time.

**SATA Slew Rate**
Configure the SRCO Slew Rate. Adjust the BCLK signal by defining the maximum change rate of the output voltage. Higher value will result in a shorter signal rising time.

**CPU PLL ORT**
Configure the CPU PLL ORT. Overshoot Reduction Technology improves the BCLK signal to decrease overshoot/undershoot.

**PCIE PLL ORT**
Configure the PCIE PLL ORT. Overshoot Reduction Technology improves the BCLK signal to decrease overshoot/undershoot.

**CPU Output Divider**
Configure the CPU output divider.

**SRC Output Divider**
Configure the SRC output divider.

**PCIE PLL Divider**
Configure the PCIE PLL divider.
**SRCO Source**
Select CPU PLL or PCIE PLL as the SRCO source.

**ClockGen Delay**
Configure the delay at the beginning of Clockgen.

**ClockGen GPIO**
Configure the General-purpose input/output (GPIO) at the beginning of Clockgen.

**Boot Performance Mode**
Select the performance state that the BIOS will set before OS handoff.

**FCLK Frequency**
Configure the FCLK Frequency.

**Intel Turbo Boost Technology**
Intel Turbo Boost Technology enables the processor to run above its base operating frequency when the operating system requests the highest performance state.

**Intel SpeedStep Technology**
Intel SpeedStep technology allows processors to switch between multiple frequencies and voltage points for better power saving and heat dissipation.

**Intel Speed Shift Technology**
Enable/Disable Intel Speed Shift Technology support. Enabling will expose the CPPC v2 interface to allow for hardware controlled P-states.

**MFC Mode Override**
Configure the MFC Mode Override.

**Adjust Pll**
Adjust the Pll for higher -BCLK ration combination.

**Change Pll Trim Value**
Adjust the Pll value between +63 ro -63.

**Change Pll Trim Prefix**
Adjust the Pll Trim Prefix.

**Change MC-Pll Trim Value**
Adjust the MC-Pll value between +63 ro -63.
Change MC-Pll Trim Prefix
Adjust the MC-Pll Trim Prefix.

TJ-Max offset
Adjust the TJ-Max offset.

DCST LUT0
Configure the DCST LUT0.

DCST LUT1
Configure the DCST LUT1.

DCST LUT2
Configure the DCST LUT2.

DCST LUT3
Configure the DCST LUT3.

AVX2 Negative Offset
AVX2 Negative Offset reduces core frequency. The AVX2 Negative Offset specifies a negative offset from the Turbo Ratio Limit for AVX2 workloads.

AVX3 Negative Offset
AVX3 Negative Offset reduces core frequency. The AVX3 Negative Offset specifies a negative offset from the Turbo Ratio Limit for AVX3 workloads.

Current Limit
Configure the current limit of the CPU under Turbo Mode in ampere. A lower limit can protect the CPU and save power, while a higher limit may improve performance.

Long Duration Power Limit
Configure Package Power Limit 1 in watts. When the limit is exceeded, the CPU ratio will be lowered after a period of time. A lower limit can protect the CPU and save power, while a higher limit may improve performance.

Long Duration Maintained
Configure the period of time until the CPU ratio is lowered when the Long Duration Power Limit is exceeded.
Short Duration Power Limit
Configure Package Power Limit 2 in watts. When the limit is exceeded, the CPU ratio will be lowered immediately. A lower limit can protect the CPU and save power, while a higher limit may improve performance.

DRAM Configuration

DRAM Tweaker
Fine tune the DRAM settings by leaving marks in checkboxes. Click OK to confirm and apply your new settings.

DRAM Timing Configuration

Load XMP Setting
Load XMP settings to overclock the DDR memory and perform beyond standard specifications.

BCLK Frequency
The CPU speed is determined by the CPU Ratio multiplied with the BCLK. Increasing the BCLK will increase the internal CPU clock speed but also affect the clock speed of other components.

DRAM Frequency
If [Auto] is selected, the motherboard will detect the memory module(s) inserted and assign the appropriate frequency automatically.

DRAM Reference Clock
Select Auto for optimized settings.

Primary Timing

CAS# Latency (tCL)
The time between sending a column address to the memory and the beginning of the data in response.

RAS# to CAS# Delay (tRCD)
RAS# to CAS# Delay : The number of clock cycles required between the opening of a row of memory and accessing columns within it.

Row Precharge (tRP)
Row Precharge: The number of clock cycles required between the issuing of the precharge command and opening the next row.
RAS# Active Time (tRAS)
The number of clock cycles required between a bank active command and issuing the precharge command.

Command Rate (CR)
The delay between when a memory chip is selected and when the first active command can be issued.

Secondary Timing

Write Recovery Time (tWR)
The amount of delay that must elapse after the completion of a valid write operation, before an active bank can be precharged.

Refresh Cycle Time (tRFC)
The number of clocks from a Refresh command until the first Activate command to the same rank.

RAS to RAS Delay (tRRD)
The number of clocks between two rows activated in different banks of the same rank.

RAS to RAS Delay (tRRD_L)
The number of clocks between two rows activated in different banks of the same rank.

Write to Read Delay (tWTR)
The number of clocks between the last valid write operation and the next read command to the same internal bank.

Write to Read Delay (tWTR_L)
The number of clocks between the last valid write operation and the next read command to the same internal bank.

Read to Precharge (tRTP)
The number of clocks that are inserted between a read command to a row precharge command to the same rank.

Four Activate Window (tFAW)
The time window in which four activates are allowed the same rank.
CAS Write Latency (tCWL)
Configure CAS Write Latency.

Third Timing

tREFI
Configure refresh cycles at an average periodic interval.

tCKE
Configure the period of time the DDR4 initiates a minimum of one refresh command internally once it enters Self-Refresh mode.

tCCD
Configure back to back CAS to CAS (i.e. READ to RAED or WRITE to WRITE) from same rank separation parameter.

tCCD_L
Configure back to back CAS to CAS (i.e. READ to RAED or WRITE to WRITE) from same rank separation parameter.

tCCD_WR_L
Configure back to back CAS to CAS (i.e. READ to RAED or WRITE to WRITE) from same rank separation parameter.

tRRDS
The number of clocks between two rows activated in different banks of the same rank.

tRRDR
Configure Read to Read different rank dead cycle Back to back READ to WRITE from different DIMM separation parameter.

tRRDD
Use this item to change tRRDD setting. The default is [Auto].

tRWSR
Use this item to change tRWSR setting. The default is [Auto].

tRWDS
Use this item to change tRWDS setting. The default is [Auto].
tRWDR
Use this item to change tRWDR setting. The default is [Auto].

tRWDD
Use this item to change tRWDD setting. The default is [Auto].

tWRDS
Use this item to change tWRDS setting. The default is [Auto].

tWRDR
Use this item to change tWRDR setting. The default is [Auto].

tWRDD
Use this item to change tWRDD setting. The default is [Auto].

tWWDS
Use this item to change tWWDS setting. The default is [Auto].

tWWDR
Use this item to change tWWDR setting. The default is [Auto].

tWWDD
Use this item to change tWWDD setting. The default is [Auto].

Advanced Setting

ODT WR (A1)
Configure the memory on die termination resistors' WR for channel A1.

ODT WR (A2)
Configure the memory on die termination resistors' WR for channel A2.

ODT WR (B1)
Configure the memory on die termination resistors' WR for channel B1.

ODT WR (B2)
Configure the memory on die termination resistors' WR for channel B2.

ODT WR (C1)
Configure the memory on die termination resistors' WR for channel C1.

ODT WR (C2)
Configure the memory on die termination resistors' WR for channel C2.
ODT WR (D1)
Configure the memory on die termination resistors' WR for channel D1.

ODT WR (D2)
Configure the memory on die termination resistors' WR for channel D2.

ODT PARK (A1)
Configure the memory on die termination resistors' PARK for channel A1.

ODT PARK (A2)
Configure the memory on die termination resistors' PARK for channel A2.

ODT PARK (B1)
Configure the memory on die termination resistors' PARK for channel B1.

ODT PARK (B2)
Configure the memory on die termination resistors' PARK for channel B2.

ODT PARK (C1)
Configure the memory on die termination resistors' PARK for channel C1.

MRC Promote Warnings
Determines if MRC warnings are promoted to system level.

Promote Warnings
Determines if warnings are promoted to system level.

Halt on mem Training Error
Use this item to enable or disable Halt on memory Training Error.

Memory Test
Use this item to enable or disable memory test during normal boot.

MemTestLoops
Set the number of memory test loops during normal boot.

Memory Test On Fast Boot
Use this item to enable or disable memory test during fast boot.

Attempt Fast Boot
Use this item to enable or disable memory test during fast boot.
Attempt Fast Cold Boot
When enabled, portions of memory reference code will be skipped when it is possible to increase boot speed.

Voltage Configuration

CPU Vcore Voltage
Configure the voltage for the CPU Vcore.

CPU Load-Line Calibration
CPU Load-Line Calibration helps prevent CPU voltage droop when the system is under heavy loading.

VPPM AB Voltage
Configure the voltage for the VPPM AB.

DRAM AB Voltage
Configure the voltage for the DRAM AB.

VTTM AB Voltage
Configure the voltage for the VTTM AB.

VPPM CD Voltage
Configure the voltage for the VPPM CD.

DRAM CD Voltage
Configure the voltage for the DRAM CD.

VTTM CD Voltage
Configure the voltage for the VTTM CD.

1.0 PCH Voltage
Configure the chipset voltage (1.0V).

PCH PLL Voltage
PCH PLL voltage helps BCLK overclocking, also slightly improves memory overclocking.

VCCIO Voltage
Configure the voltage for the VCCIO.
CPU PLL1 Voltage
Configure the voltage for the CPU PLL1.

CPU PLL1 Eventual Voltage
Configure the voltage for the eventual CPU PLL1.

CPU PLL2 Voltage
Configure the voltage for the CPU PLL2.

CPU PLL2 Eventual Voltage
Configure the voltage for the eventual CPU PLL2.

Cold Bug Killer
Cold Bug Killer Voltage. Recommended to set 2.200V~2.400V for Ln2 benching. It will solve most of CPU cold bug.

VCC SFR Voltage
Configure the voltage for the VCC SFR.

VCCSA Voltage
Configure the voltage for the VCCSA.

VCC PPL Voltage
VCC PPL helps BCLK overclocking. Also this voltage rail is input source of CPU internal PLL voltage. Please set this voltage as 1.400V~1.500V when CPU is under LN2 benching. Very few CPU requests 2.500V~2.800V to get rid of cold bug.

CLK VDD Voltage
Configure the voltage for the CLK VDD.

CPU Internal PLL Voltage
Default is 0.900V. Each step is 0.015V. Adding 9-15 steps will helps CPU PLL to lock internal clock during High frequency under Ln2 cooling. For example: 1.020V to 1.125V will be proper value. But the voltage level will be different on each processor. User has to find the best value for your own processor. CPU Vcore Voltage must higher than CPU Internal PLL Voltage, or your processor will hang.

CPU Core AC LoadLine
AC Loadline defined in 1/100 mOhms. A value of 100 = 1.00 mOhm. and 1255 = 12.55 mOhm. Range is 0-6249 (0-62.49 mOhms). 0 = AUTO/HW default. Uses BIOS mailbox command 0x2.
**CPU Core DC LoadLine**

DC Loadline defined in 1/100 mOhms. A value of 100 = 1.00 mOhm. and 1255 = 12.55 mOhm. Range is 0-6249 (0-62.49 mOhms). 0 = AUTO/HW default. UsesBIOS mailbox command 0x2.

**CPU Vcore PWM Switching Frequency**

Configure the PWM switching frequency for CPU Vcore.

**VCCSA PWM Switching Frequency**

Configure the PWM switching frequency for VCCSA.

**Vcore/VCCSA OVP**

Configure the Vcore/VCCSA OVP.

**Vcore/VCCSA OCP**

Configure the Vcore/VCCSA OCP.

**Vcore/VCCSA UVP**

Configure the Vcore/VCCSA UVP.

**CPU Vcore Per-Phase OCP**

Configure the Per-Phase OCP for CPU Vcore.

**VCCSA Per-Phase OCP**

Configure the Per-Phase OCP for VCCSA.

**Isense Gain**

Configure the Isense Gain.

**VCCIO PWM Switching Frequency**

Configure the PWM switching frequency for VCCIO PWM.

**PWM2 OVP**

Configure the OVP for PWM2.

**PWM2 OCP**

Configure the OCP for PWM2.

**PWM2 UVP**

Configure the UVP for PWM2.
VCCIO Per-Phase OCP
Configure the Per-Phase OCP for VCCIO.

DRAM Voltage CD PWM Switching Frequency
Configure the PWM switching frequency for DRAM voltage on channel C, D.

PWM3 OVP
Configure the OVP for PWM3.

PWM3 OCP
Configure the OCP for PWM3.

PWM3 UVP
Configure the UVP for PWM3.

DRAM Voltage AB Per-Phase OCP
Configure the Per-Phase OCP for DRAM voltage on channel A, B.

DRAM Voltage CD Per-Phase OCP
Configure the Per-Phase OCP for DRAM voltage on channel C, D.

DRAM Voltage AB PWM Switching Frequency
Configure the PWM switching frequency for DRAM voltage on channel A, B.

FIVR Configuration

Core Voltage Mode
Selects between Adaptive and Override Voltage modes. In Override Mode, the voltage selected will be applied over all operating frequencies. In Adaptive mode, the voltage is interpolated only in turbo mode.

Core Voltage Override.
Specifies the Override Voltage applied to the IA Core domain. This voltage is specified in millivolts.

Core Extra Turbo Voltage
Specifies the extra turbo voltage applied while the IA Core is operating in turbo mode.
Core Voltage Offset
Specifies the offset voltage applied to the IA Core domain. This voltage is specified in millivolts.

Offset Prefix
Sets the offset value as positive or negative.

CLR Voltage Mode
Selects between Adaptive and Override Voltage modes. In Override Mode the voltage selected will be applied over all operating frequencies. In Adaptive Mode the voltage is interpolated only in turbo mode.

CLR Voltage Override
Specifies the Override Voltage applied to the GT domain. This voltage is specified in millivolts.

CLR Extra Turbo Voltage
Specifies the extra turbo voltage applied while GT is operating in turbo mode. Unit is in millivolts.

CLR Voltage Offset
Specifies the Offset Voltage applied to the GT domain. This voltage is specified in millivolts.

Offset Prefix
Sets the offset value as positive or negative.

Uncore Voltage Offset
Specifies the Offset Voltage applied to the Uncore domain. This voltage is specified in millivolts.

Offset Prefix
Sets the offset value as positive or negative.

FIVR Faults
Enable/Disable FIVR Faults. When FIVR faults are disabled, OVP and OCP protection mechanism will be masked. This is a dangerous configuration and the risk of using it is assumed by the user.
FIVR Efficiency Management
FIVR efficiency management is good for power delivery efficiency, but it may be an impediment to proper power delivery control under overclocking, particularly BCLK overclocking.

SVID Support
Enable/Disable SVID. Disabling SVID disables input voltage overrides.

Save User Default
Type a profile name and press enter to save your settings as user default.

Load User Default
Load previously saved user defaults.

Save User UEFI Setup Profile to Disk
It helps you to save current UEFI settings as an user profile to disk

Load User UEFI Setup Profile from Disk
You can load previous saved profile from the disk
4.6 Advanced Screen

In this section, you may set the configurations for the following items: CPU Configuration, Chipset Configuration, Storage Configuration, Super IO Configuration, ACPI Configuration, USB Configuration and Trusted Computing.

UEFI Configuration

UEFI Setup Style

Select the default mode when entering the UEFI setup utility.

Active Page on Entry

Select the default page when entering the UEFI setup utility.

Full HD UEFI

When [Auto] is selected, the resolution will be set to 1920 x 1080 if the monitor supports Full HD resolution. If the monitor does not support Full HD resolution, then the resolution will be set to 1024 x 768. When [Disable] is selected, the resolution will be set to 1024 x 768 directly.

Setting wrong values in this section may cause the system to malfunction.
4.6.1 CPU Configuration

Hyper Threading Technology

Intel Hyper Threading Technology allows multiple threads to run on each core, so that the overall performance on threaded software is improved.

Active Processor Cores

Select the number of cores to enable in each processor package.

CPU C States Support

Enable CPU C States Support for power saving. It is recommended to keep C3, C6 and C7 all enabled for better power saving.

Enhanced Halt State (C1E)

Enable Enhanced Halt State (C1E) for lower power consumption.

CPU C6 State Support

Enable C6 deep sleep state for lower power consumption.

Package C State Support

Enable CPU, PCIe, Memory, Graphics C State Support for power saving.

CFG Lock

This item allows you to disable or enable the CFG Lock.
CPU Thermal Throttling
Enable CPU internal thermal control mechanisms to keep the CPU from overheating.

Intel Virtualization Technology
Intel Virtualization Technology allows a platform to run multiple operating systems and applications in independent partitions, so that one computer system can function as multiple virtual systems.

Intel Safer Mode Extensions (SMX)
Enable/disable the Intel SMX (Safer Mode Extensions).

Hardware Prefetcher
Automatically prefetch data and code for the processor. Enable for better performance.

Adjacent Cache Line Prefetch
Automatically prefetch the subsequent cache line while retrieving the currently requested cache line. Enable for better performance.
4.6.2 Chipset Configuration

Above 4GB MMIO BIOS Assignment
Enable/disable above 4GB MemoryMappedIO BIOS assignment. This is disabled automatically when Aperture Size is set to 2048MB.

VT-d
Intel® Virtualization Technology for Directed I/O helps your virtual machine monitor better utilize hardware by improving application compatibility and reliability, and providing additional levels of manageability, security, isolation, and I/O performance.

PCIE1 Link Speed
Select the link speed for PCIE1.

PCIE2 Link Speed
Select the link speed for PCIE2.

PCIE3 Link Speed
Select the link speed for PCIE3.

PCIE4 Link Speed
Select the link speed for PCIE4.
PCIE5 Link Speed
Select the link speed for PCIE5.

PCI Express Native Control
Select Enable for enhanced PCI Express power saving in OS.

PCIE ASPM Support
This option enables/disables the ASPM support for all CPU downstream devices.

PCH PCIE ASPM Support
This option enables/disables the ASPM support for all PCH PCIE devices.

PCH DMI ASPM Support
This option enables/disables the ASPM support for all PCH DMI devices.

Onboard LAN
Enable or disable the onboard network interface controller.

Intel® Ethernet Connection I211AT
Enable or disable the onboard network interface controller (Intel® I211AT).

Onboard HD Audio
Enable/disable onboard HD audio. Set to Auto to enable onboard HD audio and automatically disable it when a sound card is installed.

Front Panel
Enable/disable front panel HD audio.

Deep Sleep
Configure deep sleep mode for power saving when the computer is shut down.

Restore on AC/Power Loss
Select the power state after a power failure. If [Power Off] is selected, the power will remain off when the power recovers. If [Power On] is selected, the system will start to boot up when the power recovers.

Turn On LED in S5
Turn on/off the LED in the ACPI S5 state.

Onboard Debug Port LED
Enable/disable the onboard Dr. Debug LED.
4.6.3 Storage Configuration

SATA Controller(s)
Enable/disable the SATA controllers.

SATA Controller Speed
Indicates the maximum speed the SATA controller can support.

SATA Mode Selection
[AHCI]: Supports new features that improve performance.
[RAID]: Combine multiple disk drives into a logical unit.

Alternate ID
Alternate ID allows you to enable or disable the report for the alternate device ID.
[Enabled]: Enable the RSTe (Rapid Storage Technology enterprise) feature.
[Disabled]: Enable the RST (Rapid Storage Technology) feature.

*Please note that if you install CPU with 44 lanes or 28 lanes, RSTe does not support PCH PCIe NVME and VROC (Intel® Virtual RAID on CPU) is supported.
SATA Aggressive Link Power Management

SATA Aggressive Link Power Management allows SATA devices to enter a low power state during periods of inactivity to save power. It is only supported by AHCI mode.

Hard Disk S.M.A.R.T.

S.M.A.R.T stands for Self-Monitoring, Analysis, and Reporting Technology. It is a monitoring system for computer hard disk drives to detect and report on various indicators of reliability.
4.6.4 Super IO Configuration

PS2 Y-Cable

Enable the PS2 Y-Cable or set this option to Auto.
4.6.5 ACPI Configuration

Suspend to RAM
Select disable for ACPI suspend type S1. It is recommended to select auto for ACPI S3 power saving.

PS/2 Keyboard Power On
Allow the system to be waked up by a PS/2 Keyboard.

PCIE Devices Power On
Allow the system to be waked up by a PCIE device and enable wake on LAN.

RTC Alarm Power On
Allow the system to be waked up by the real time clock alarm. Set it to By OS to let it be handled by your operating system.

USB Keyboard/Remote Power On
Allow the system to be waked up by an USB keyboard or remote controller.

USB Mouse Power On
Allow the system to be waked up by an USB mouse.
4.6.6 USB Configuration

**Legacy USB Support**
Enable or disable Legacy OS Support for USB 2.0 devices. If you encounter USB compatibility issues it is recommended to disable legacy USB support. Select UEFI Setup Only to support USB devices under the UEFI setup and Windows/Linux operating systems only.

**PS/2 Simulator**
Enable PS/2 Simulator. This should be enabled for the complete USB keyboard legacy support for non-USB aware OSes.

*Enable this option if you install Windows 7.

**XHCI Hand-off**
This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
4.6.7 Trusted Computing

Security Device Support
Enable or disable BIOS support for security device.
4.7 Tools

UEFI Tech Service
Contact ASRock Tech Service if you are having trouble with your PC. Please setup network configuration before using UEFI Tech Service.

Easy RAID Installer
Easy RAID Installer helps you to copy the RAID driver from the support CD to your USB storage device. After copying the drivers please change the SATA mode to RAID, then you can start installing the operating system in RAID mode.

Instant Flash
Save UEFI files in your USB storage device and run Instant Flash to update your UEFI.

Internet Flash - DHCP (Auto IP), Auto
ASRock Internet Flash downloads and updates the latest UEFI firmware version from our servers for you. Please setup network configuration before using Internet Flash.
*For BIOS backup and recovery purpose, it is recommended to plug in your USB pen drive before using this function.
Secure Backup UEFI

Whenever one of the ROM images are outdated or corrupted, switch to the other flash ROM and execute Secure Backup UEFI to duplicate the current working ROM image to the secondary flash ROM.

This motherboard has two BIOS chips, an active BIOS (BIOS_A) and a backup BIOS (BIOS_B), which enhances the safety and stability of your system. Use “Secure Backup UEFI” to duplicate a working copy of the BIOS files to the active BIOS to ensure normal system operation. Normally, the system will work on the active BIOS. However if the active BIOS is corrupted or damaged, after several failed boot attempts, the backup BIOS will take over. For safety issues, users are not able to update the backup BIOS manually. Users may refer to the BIOS LEDs (BIOS_A_LED or BIOS_B_LED) to identify which BIOS is currently activated.

Network Configuration

Use this to configure internet connection settings for Internet Flash.

Internet Setting

Enable or disable sound effects in the setup utility.

UEFI Download Server

Select a server to download the UEFI firmware.
4.8 Hardware Health Event Monitoring Screen

This section allows you to monitor the status of the hardware on your system, including the parameters of the CPU temperature, motherboard temperature, fan speed and voltage.

Fan-Tastic Tuning

Select a fan mode for CPU Fans 1&2, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

CPU Fan 1 Setting

Select a fan mode for CPU Fans 1, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

CPU Fan Step Up

Set the value of CPU Fan Step Up.

CPU Fan Step Down

Set the value of CPU Fan Step Down.

CPU_OPT / W_Pump Switch

Select CPU Optional or Water Pump mode.
CPU Optional Fan Control Mode
Select PWM mode or DC mode for CPU Optional fan.

CPU Optional Fan Setting
Select a fan mode for CPU Optional fan, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

CPU Optional Fan Temp Source
Select a fan temperature source for CPU Optional fan.

CPU Optional Fan Step Up
Set the value of CPU Optional fan Step Up.

CPU Optional Fan Step Down
Set the value of CPU Optional fan Step Down.

Chassis Fan 1 Setting
Select a fan mode for Chassis Fan 1, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

Chassis Fan 1 Temp Source
Select a fan temperature source for Chassis Fan 1.

Chassis Fan 1 Step Up
Set the value of Chassis Fan 1 Step Up.

Chassis Fan 1 Step Down
Set the value of Chassis Fan 1 Step Down.

Chassis Fan 2 Setting
Select a fan mode for Chassis Fan 2, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

Chassis Fan 2 Temp Source
Select a fan temperature source for Chassis Fan 2.

Chassis Fan 2 Step Up
Set the value of Chassis Fan 2 Step Up.
Chassis Fan 2 Step Down
Set the value of Chassis Fan 2 Step Down.

CHA_FAN3 / W_Pump Switch
Select CHA_FAN3/CPU Optional or Water Pump mode.

Chassis Fan 3 Control Mode
Select PWM mode or DC mode for Chassis Fan 3.

Chassis Fan 3 Setting
Select a fan mode for Chassis Fan 3, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

Chassis Fan 3 Temp Source
Select a fan temperature source for Chassis Fan 3.

Chassis Fan 3 Step Up
Set the value of Chassis Fan 3 Step Up.

Chassis Fan 3 Step Down
Set the value of Chassis Fan 3 Step Down.

Over Temperature Protection
When Over Temperature Protection is enabled, the system automatically shuts down when the motherboard is overheated.
4.9 Security Screen

In this section you may set or change the supervisor/user password for the system. You may also clear the user password.

Supervisor Password
Set or change the password for the administrator account. Only the administrator has authority to change the settings in the UEFI Setup Utility. Leave it blank and press enter to remove the password.

User Password
Set or change the password for the user account. Users are unable to change the settings in the UEFI Setup Utility. Leave it blank and press enter to remove the password.

Secure Boot
Use this item to enable or disable support for Windows 8.1 Secure Boot.

Intel(R) Platform Trust Technology
Enable/disable Intel PTT in ME. Disable this option to use discrete TPM Module.
4.10 Boot Screen

This section displays the available devices on your system for you to configure the boot settings and the boot priority.

Boot From Onboard LAN
Allow the system to be waked up by the onboard LAN.

Setup Prompt Timeout
Configure the number of seconds to wait for the setup hot key.

Bootup Num-Lock
Select whether Num Lock should be turned on or off when the system boots up.

Boot Beep
Select whether the Boot Beep should be turned on or off when the system boots up. Please note that a buzzer is needed.

Full Screen Logo
Enable to display the boot logo or disable to show normal POST messages.

AddOn ROM Display
Enable AddOn ROM Display to see the AddOn ROM messages or configure the AddOn ROM if you’ve enabled Full Screen Logo. Disable for faster boot speed.
Boot Failure Guard Message

If the computer fails to boot for a number of times the system automatically restores the default settings.

CSM (Compatibility Support Module)

Enable to launch the Compatibility Support Module. Please do not disable unless you're running a WHCK test. If you are using Windows 8.1 64-bit and all of your devices support UEFI, you may also disable CSM for faster boot speed.

Launch PXE OpROM Policy

Select UEFI only to run those that support UEFI option ROM only. Select Legacy only to run those that support legacy option ROM only. Select Do not launch to not execute both legacy and UEFI option ROM.

Launch Storage OpROM Policy

Select UEFI only to run those that support UEFI option ROM only. Select Legacy only to run those that support legacy option ROM only. Select Do not launch to not execute both legacy and UEFI option ROM.

Launch Video OpROM Policy

Select UEFI only to run those that support UEFI option ROM only. Select Legacy only to run those that support legacy option ROM only. Select Do not launch to not execute both legacy and UEFI option ROM.
4.11 Exit Screen

Save Changes and Exit
When you select this option the following message, “Save configuration changes and exit setup?” will pop out. Select [OK] to save changes and exit the UEFI SETUP UTILITY.

Discard Changes and Exit
When you select this option the following message, “Discard changes and exit setup?” will pop out. Select [OK] to exit the UEFI SETUP UTILITY without saving any changes.

Discard Changes
When you select this option the following message, “Discard changes?” will pop out. Select [OK] to discard all changes.

Load UEFI Defaults
Load UEFI default values for all options. The F9 key can be used for this operation.

Launch EFI Shell from filesystem device
Copy shellx64.efi to the root directory to launch EFI Shell.
Contact Information

If you need to contact ASRock or want to know more about ASRock, you're welcome to visit ASRock’s website at http://www.asrock.com; or you may contact your dealer for further information. For technical questions, please submit a support request form at http://www.asrock.com/support/tsd.asp
